PRODUCER PAL GENIUS -- ULTIMATE MASTER FIELD GUIDE & PLAYBOOK

The Definitive Cheat Sheet & Playbook -- Exhaustive Prompts, Tools, Workflows & Sound Design for Ableton Live 12 Standard

108 Native Bridge Tools | 140 Master Actions | 14 Multi-Step Genre Recipes | Windows DSP Ears | Live 12 Remote Scripts

1. Core Session, Transport & Navigation

Control playback, transport playhead, undo/redo, punch markers, master crossfader, and session inspection.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"What's in my current Live Set?"	Reads tempo, signature, track names, return tracks, master chain, and scene count.	`live_read_set, live_context`
"What do I currently have selected in Live?"	Inspects the GUI track, scene, clip slot, or device under the mouse cursor.	`live_get_selected`
"Set the project tempo to 128 BPM and scale to F Minor"	Sets master BPM, time signature, and project musical scale/key.	`live_update_set`
"Tap tempo 4 times at ~124 BPM"	Simulates transport tap tempo to dynamically calculate and set session tempo.	`live_tap_tempo`
"Play the arrangement from beat 32"	Jumps the arrangement playhead directly to bar/beat 32 and starts playback.	`live_jump_to_time, live_playback`
"Scrub backward 4 beats / Jump to next cue point"	Scrubs playhead forward/backward or jumps to adjacent locators.	`live_scrub, live_jump_cue`
"Undo the last action in Live / Redo"	Triggers native Ableton Undo or Redo without touching the keyboard.	`live_undo, live_redo`
"Turn on punch-in at bar 8 and overdub recording"	Arms punch-in / punch-out recording and enables arrangement overdub.	`live_set_punch, live_set_overdub`
"Take a snapshot of my session state / Compare diff"	Captures full state to verify before/after changes or detect drift.	`live_session_snapshot, live_session_diff`
"Move master crossfader hard to Side A"	Controls crossfader slider (-1.0 to +1.0) and assigns track routing.	`live_set_crossfader`
"Focus the Arrangement view / Focus Detail Clip view"	Directly shifts Live GUI focus between Session, Arrangement, and Detail.	`live_focus_view`

2. Tracks, Routing & Batch Operations

Create audio/MIDI/return tracks, adjust mixer parameters, toggle group fold states, or batch-control tracks.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Create a new MIDI track named 'Lead Synth'"	Creates a MIDI, audio, or return track with custom naming and color.	`live_create_track`
"Turn track 2 volume down by 3 dB and pan it 25% left"	Adjusts volume, pan, mute, solo, arm, or sends on any track index.	`live_update_track, live_edit_track`
"Fold all group tracks to tidy up Session view"	Inspects or toggles the fold/collapse state of group tracks.	`live_set_fold_state`
"Mute all tracks except the Drums track"	Batch-mutes, solos, un-arms, or resets send levels across all tracks.	`live_batch_tracks`
"Duplicate track 1 with all its devices and clips"	Creates a duplicate copy of an entire track and its signal chain.	`live_duplicate`
"Delete track 5 from the project"	Removes a track permanently from the active Live set.	`live_delete`
"Solo the Bass track and un-arm everything"	Performs surgical soloing or set-wide track arming adjustments.	`live_batch_tracks, live_update_track`

3. Session Clips, Scenes & Launch Modes

Create clips, manage scenes, set launch quantization, follow actions, audio fades, and loop parameters.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Create a 4-bar empty MIDI clip on track 1, slot 0"	Creates an empty clip with specified length in Session view.	`live_create_clip`
"Set clip 0 on track 1 to Legato launch with 1/16 quantization"	Configures launch quantization (None to 8 Bars) and Legato toggle.	`live_set_clip_launch_mode`
"Configure Follow Action on clip 0: 80% Play Next, 20% Stop"	Sets follow action A/B, chance probability, and jump target.	`live_set_clip_follow_action`
"Double the loop length of clip 0 on track 2 and duplicate notes"	Expands loop bracket (e.g. 2 bars -> 4 bars) duplicating internal MIDI notes.	`live_duplicate_loop`
"Capture the currently playing session clips into a new scene"	Creates a new scene from currently playing clips (Capture and Insert Scene).	`live_create_scene`
"Fire Scene 2 / Stop all playing clips in the session"	Launches all clips on scene row or sends global session stop.	`live_edit_scene`, `live_stop_all_clips`
"Set loop start to beat 4 and loop length to 8 beats on clip 0"	Sets start/end markers and loop bracket boundaries on audio/MIDI clip.	`live_set_clip_markers`
"Apply a 0.25 beat fade-in and 0.5 beat fade-out on audio clip 0"	Applies non-destructive volume fades to start/end of audio session clip.	`live_set_clip_fades`

4. Algorithmic Composition & MIDI Generation

Generate chords, Euclidean polyrhythms, walking basslines, step-sequencer grids, and motif transformations.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Generate a 4-bar Neo-Soul chord progression in Db Major"	Writes voiced chords with smooth voice leading, extensions, and inversions.	`live_generate_chords`
"Write a ii-V-I progression using Roman numerals in C Major"	Generates voiced chords from Roman numerals (e.g. Dm7 - G7 - Cmaj7).	`live_create_chord_progression`
"Generate an 8-pulse over 16-step Euclidean rhythm for hats"	Calculates Bjorklund Euclidean spacing for generative polyrhythms.	`live_generate_euclidean`
"Create a quarter-note walking bassline over Dm7 - G7 - Cmaj7"	Generates jazz/blues walking bassline with chromatic approaches to roots.	`live_generate_walking_bass`
"Write this ASCII drum grid: K: x...x... S: ....x... H: x.x.x.x."	Parses multi-line ASCII drum strings directly into timed MIDI events.	`live_write_drum_grid`
"Program an 808 Trap pattern: Kick x...x..., Snare ....x..."	Generates full drum kit pattern from shorthand step string.	`live_create_drum_pattern`
"Invert the melody on clip 0 track 1 / Retrograde / Transpose +7"	Applies motif transformations (mirror intervals, reverse notes, shift pitch).	`live_transform_clip`
"Attach the MPC 60 16-Swing groove to track 1 clip 0"	Browses the Groove Pool and attaches groove swing template to clip.	`live_groove_pool`
"Commit the groove swing permanently into clip MIDI note timing"	Bakes groove timing/velocity offsets directly into clip note data.	`live_commit_groove`

5. Arrangement Timeline & Comping Take Lanes

Record session performances to timeline, duplicate clips to arrangement, edit arrangement notes, and manage take lanes.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Record scene 1 into the Arrangement starting at bar 17"	Automates playback recording from Session clips into the linear timeline.	`live_record_to_arrangement`
"Duplicate clip 0 on track 1 to arrangement at bar 33"	Copies a session clip directly to an arrangement timeline beat position.	`live_duplicate_to_arrangement`
"What clips are currently on the Arrangement timeline?"	Lists all arrangement clips across all tracks with start times and lengths.	`live_read_arrangement_clips`
"Move arrangement clip 0 on track 1 to bar 49"	Repositions an arrangement clip along the timeline or across tracks.	`live_move_arrangement_clip`
"Read MIDI notes from arrangement clip 0 on track 2"	Extracts note pitch, start time, duration, and velocity from timeline clip.	`live_read_arrangement_notes`
"Write an 8-bar chord progression into arrangement track 1 bar 17"	Writes MIDI note events directly onto the arrangement timeline.	`live_write_arrangement_notes`
"Create a new comping take lane on track 1 named 'Vocal Take 3'"	Creates an audio/MIDI comping take lane for multi-pass recording.	`live_create_take_lane`, `live_update_take_lane`
"What take lanes exist on track 2?"	Inspects all comping take lanes on an arrangement track.	`live_read_take_lanes`
"Create an empty MIDI clip in take lane 0 on track 1"	Creates a blank clip directly inside a specified take lane.	`live_create_take_lane_clip`
"Return all tracks to the Arrangement timeline"	Re-engages arrangement playback after triggering session clips.	`live_back_to_arranger`

6. Native Devices, Racks & VST Plugins

Insert native devices, modify parameters in real-world units, map rack macros, and inspect VST/AU plugins.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Add an EQ Eight to track 1 / Add a Compressor to track 2"	Inserts native Ableton devices by name onto any track index.	`live_create_device`
"What devices are loaded on track 1?"	Lists all devices, rack chains, and parameters on a track.	`live_read_track`, `live_read_device`
"Set EQ Eight Band 1 Frequency to 120 Hz and Gain to -3 dB"	Updates device parameters in real display units (Hz, dB, ms, %, semitones).	`live_update_device`
"What are the 16 macro controls on track 1's Instrument Rack?"	Queries macro names, values, and min/max ranges on any Rack device.	`live_read_macros`
"Set Macro 1 (Filter Cutoff) to 2.4 kHz on track 1"	Adjusts Rack macro knob by index or parameter name.	`live_update_macro`
"Analyze this Audio Effect Rack and map its Dry/Wet magnitude"	Identifies the core intensity/blend macro on complex multi-effect racks.	`live_map_rack_magnitude`
"Move device 2 on track 1 to position 0 (first in chain)"	Re-orders devices within a track's serial signal chain.	`live_move_device`
"Inspect the parameters on the Serum / Vital VST plugin on track 3"	Deep parameter discovery: lists all exposed VST/AU plugin parameters.	`live_inspect_plugin`
"Delete the second device on track 2"	Removes a device safely from a track's processing chain.	`live_delete_device`

7. Automation & Shaped Modulation Curves

Generate algorithmic LFO curves on any parameter, write custom clip envelopes, and clear modulation.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Add a 2-cycle sine wave automation curve to Volume on clip 0 track 1"	Generates smooth sinusoidal LFO automation curve on any parameter.	`live_add_shaped_automation`
"Add an exponential lowpass filter sweep opening over 4 bars"	Draws exponential curved automation ramp for dramatic build-ups.	`live_add_shaped_automation`
"Add a triangle wave panning wobble across 8 bars on clip 0"	Generates ping-pong stereo panning modulation envelope.	`live_add_shaped_automation`
"Write custom automation points for Cutoff on clip 0: (0.0, 0.2), (4.0, 0.9)"	Writes exact coordinate-based parameter automation into clip.	`live_set_clip_automation`
"Does clip 0 on track 1 have automation envelopes written?"	Checks whether a clip contains parameter automation envelopes.	`live_get_clip_automation`
"Clear all automation envelopes from clip 0 on track 1"	Surgically wipes all parameter envelopes from a clip without deleting notes.	`live_clear_clip_envelopes`
"Re-enable automation overridden by manual knob movement"	Re-engages automation playback after manual tweaking.	`live_re_enable_automation`

8. Desktop Host Tools (Offline Project Intelligence)

Inspect saved .als project files, extract MIDI, diff projects, and lint for missing files without opening Live.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Inspect my saved project 'B:/Projects/Track1.als'"	Reads tempo, signature, track inventory, and plugins from .als on disk.	`als_summary`
"What plugins and tracks are used in 'B:/Projects/Demo.als'?"	Catalogs all tracks, mixer volumes, pans, and loaded devices from .als.	`als_list_tracks`
"Extract MIDI notes from the bassline clip in 'B:/Projects/Song.als'"	Extracts MIDI note events directly from a saved .als without running Live.	`als_extract_midi`
"Diff two saved sets: 'Project_v1.als' vs 'Project_v2.als'"	Compares two .als files to report added/removed tracks, plugins, tempo changes.	`als_diff`
"Find unfinished tracks or missing samples in 'B:/Projects/Album.als'"	Lints project for silent tracks, empty clips, missing plugins, unlinked files.	`als_find_unfinished`

9. The 14 Multi-Step Genre Production Recipes (Deep Dive)

Pre-engineered production blueprints from Pantani/ableton-mind. Each recipe automatically creates tracks, loads native devices, dials in parameters, and writes timed MIDI.

Recipe ID & Genre	What to Say / Prompt	Devices, Knobs & MIDI Generated	Key Devices Loaded
`bass/reese`	**"Apply recipe bass/reese on a new track"**	Creates Detroit/DnB Reese Bass with dual detuned saw oscillators, lowpass filter at 1.4 kHz, and subtle chorus widening. Creates a 4-bar sustained low F1/F2 MIDI clip.	`Drift, Chorus-Ensemble`
`bass/acid-303`	**"Build a Roland TB-303 acid bassline"**	Creates TB-303 style acid bassline: resonant lowpass filter with high resonance (70%), envelope mod (85%), and rapid 16th-note MIDI with accents, slides, and octave jumps.	`Drift, Overdrive`
`bass/sub-808`	**"Drop a heavy 808 sub bass on track 2"**	Creates clean 808 sub bass with pure sine wave, saturated harmonic overtones via Drive, and pitch-glide legato MIDI notes.	`Drift / Wavetable, Saturator`
`drums/trap-808`	**"Build a complete 808 Trap drum beat"**	Loads Drum Rack with 808 samples, programs rolling hi-hats with 32nd-note triplets, syncopated snare on beat 3, claps, and open hats.	`Drum Rack, Saturator`
`drums/house-909`	**"Create a classic 909 House drum groove"**	4-on-the-floor 909 kick, offbeat open hi-hat on the 'and' of each beat, layered clap/snare on 2 and 4, and 16th-note swing percussion.	`Drum Rack, Compressor`
`drums/techno-rumble`	**"Build an industrial Techno rumble kick"**	Sets up low-end sub-rumble kick chain: primary punchy kick combined with delayed, reverb-washed, distorted sub rumble sidechained to kick.	`Drum Rack, Hybrid Reverb, Saturator`
`drums/lofi-hiphop`	**"Generate a dusty lofi hip-hop drum beat"**	Launches vintage boom-bap pattern with lazy swung hats (MPC swing 60%), low-velocity ghost snares, and filtered vinyl crackle.	`Drum Rack, Vinyl Distortion`
`chords/neo-soul`	**"Generate lush Neo-Soul chord progression"**	Creates electric piano track with Chorus and Warm Saturation. Writes 4-bar progression in Db Major using rootless 9th, 11th, and 13th chords.	`Electric / Wavetable, Chorus`
`chords/synthwave`	**"Build an 80s retro Synthwave chord pad"**	Dual detuned saw pad with 80s chorus, moderate attack, long release, and nostalgic minor-key progression with 8th-note pulse.	`Drift, Chorus-Ensemble, Delay`
`chords/deep-house`	**"Create minor 9th Deep House chord stabs"**	FM-style minor chord stab with short decay, snappy filter envelope, spring reverb, and syncopated offbeat rhythmic placement.	`Wavetable, Delay, Reverb`
`lead/euphoric`	**"Create a euphoric EDM / Trance supersaw lead"**	Multi-voice supersaw lead with high unison spread, sidechained ducking, stereo ping-pong delay, and anthemic ascending melody.	`Wavetable, Delay, Compressor`
`lead/lofi-keys`	**"Generate dreamy lofi Rhodes / piano keys"**	Wobbly pitch-modulated keys with subtle vibrato LFO, tape saturation, bandpass filter, and nostalgic seventh chord arpeggiation.	`Electric, Vinyl Distortion`
`fx/riser`	**"Build an 8-bar white noise tension riser"**	Creates 8-bar build-up riser with sweeping highpass filter, pitch-ascending noise oscillator, and increasing delay feedback.	`Wavetable, Delay, Auto Filter`
`fx/sub-drop`	**"Drop a cinematic sub-bass impact drop"**	Pitch-sweeping sub boom descending from 120 Hz to 30 Hz over 2 bars with heavy compression and sub-harmonic generation.	`Drift, Compressor`

10. Audio Analysis, Metering & Loopback ('Genius Ears')

Listen to Live's actual audio output via Windows loopback, run acoustic DSP analysis, and audit mix balance.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Record 4 seconds of audio from Live and analyze it"	Captures Windows loopback audio output and extracts LUFS, RMS, and peaks.	`live_record_and_analyze`
"What are the real-time peak and RMS levels on the Master track?"	Reads live hardware audio meters from Ableton's mixer channels.	`live_read_meter`
"Analyze the audio file 'B:/Audio/Bounce.wav' for loudness and balance"	Extracts Integrated LUFS, True Peak dBFS, spectral balance, and dynamic range.	`live_analyze_audio`
"Compare mix 'Bounce_v1.wav' against reference 'Reference.wav'"	A/B acoustic comparison: reports LUFS delta, frequency differences, peak margin.	`live_compare_audio`
"Record 8 bars of track 2 to a WAV file on disk"	Captures soloed track audio directly to disk via loopback for offline analysis.	`live_record_audio`

11. Automated Mix Health & Gain Staging Audit

Identify headroom clipping, muddy low-end buildup, phase cancellation, and gain staging issues across all tracks.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Run a complete mix health audit on my current session"	Automated 4-check audit: Limiter ceiling, headroom margin, mono bass, empty tracks.	`live_analyze_mix`
"Check if any tracks in my set are clipping above 0 dBFS"	Scans all track meters to pinpoint digital clipping and overs.	`live_analyze_mix, live_read_meter`
"Is my sub-bass centered in mono below 100 Hz?"	Verifies stereo correlation in the sub band to prevent vinyl/club phase cancellation.	`live_analyze_mix, live_analyze_audio`
"Which tracks have inactive devices or silent clips?"	Lints set for abandoned tracks and wasted CPU cycles.	`live_analyze_mix, live_read_track`

12. The Genius Studio Knowledge Base & Manuals

Full-text search (FTS5) across official Ableton Live 12 documentation, plugin manuals, and music theory books.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Search the studio library for 'sidechain compression in Live 12'"	FTS5 keyword search across official manuals and music production literature.	`library_search, library_db_search`
"What does the manual say about Drift's Cycling envelope mode?"	Retrieves official device manual chapter and explains parameters.	`library_read, library_search`
"Search the music theory database for 'Dorian modal interchange'"	Queries local Music Theory FTS5 index for harmonic explanations.	`library_db_search`
"Find documentation on Roar's Multi-band saturation routing"	Searches Live 12 reference guides for advanced device architectures.	`library_search`

13. Music Theory & Harmonic Voicings Masterclass

Essential harmonic formulas, modal emotional characteristics, chord extensions, and voice leading principles.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Major Scale (Ionian)"	Bright, resolved, triumphant, uplifting. Formula: W-W-H-W-W-W-H (1, 2, 3, 4, 5, 6, 7). Chord qualities: Imaj7, iim7, iiim7, IVmaj7, V7, vim7, viio.	`Scale: C-D-E-F-G-A-B`
"Dorian Mode"	Jazzy, melancholic yet hopeful, sophisticated minor. Formula: 1, 2, b3, 4, 5, 6, b7. Distinctive tone: Major 6th. Key progression: im7 - IV7 (e.g. Dm7 - G7).	`Characteristic: Nat 6th`
"Phrygian Mode"	Dark, exotic, Spanish/Flamenco, menacing, tension-heavy. Formula: 1, b2, b3, 4, 5, b6, b7. Distinctive tone: Minor 2nd. Key progression: im - bII (e.g. Em - F).	`Characteristic: b2`
"Lydian Mode"	Dreamy, mystical, cinematic, ethereal, floating. Formula: 1, 2, 3, #4, 5, 6, 7. Distinctive tone: Augmented 4th (#4). Key progression: I - II (e.g. F - G).	`Characteristic: #4`
"Mixolydian Mode"	Bluesy, funky, driving rock, resolved dominant. Formula: 1, 2, 3, 4, 5, 6, b7. Distinctive tone: Minor 7th. Key progression: I - bVII - IV (e.g. G - F - C).	`Characteristic: b7`
"Aeolian (Natural Minor)"	Sad, emotional, serious, epic, classical minor. Formula: 1, 2, b3, 4, 5, b6, b7. Chord qualities: im7, iio, bIIImaj7, ivm7, vm7, bVImaj7, bVII7.	`Formula: W-H-W-W-H-W-W`
"Locrian Mode"	Dissonant, unstable, tense, unresolved. Formula: 1, b2, b3, 4, b5, b6, b7. Distinctive tone: Diminished 5th (b5). Key chord: im7b5 (Half-diminished).	`Characteristic: b5`
"Drop-2 Voicings"	Essential jazz/keys voicing: take the second note from the top of a closed chord and drop it down an octave. Creates open, rich, non-muddy chords.	`Technique: Drop-2`
"Rootless Voicings"	Omit the root (played by the bass player) and play the 3rd, 7th, 9th, and 11th/13th. Gives maximum harmonic color without low-mid clutter.	`Technique: Rootless 9/11`
"Tritone Substitution"	Substitute any dominant 7th chord with another dominant 7th chord whose root is three whole tones (a tritone) away (e.g. Db7 sub for G7 in C Major).	`Formula: SubV7 for V7`
"Secondary Dominants"	Temporarily tonicize a non-tonic chord by preceding it with its own dominant 7th (e.g. V7/ii -> D7 leading into Dm7 in C Major).	`Formula: V7/x -> x`
"Smooth Voice Leading"	Keep common tones between consecutive chords in the same voice; move other voices by step (1 or 2 semitones) rather than leaping.	`Golden Rule: Minimal Motion`

14. Sound Design & Device Parameter Reference

Exact parameter targets, filter types, envelope curves, and frequency bands for native Ableton Live devices.

Topic / Concept	How It Works & What to Ask Genius	Tools / Target Commands
Drift: Reese Bass	Osc 1: Saw, Osc 2: Saw detuned +7 to +12 cents. Filter: Lowpass 12 dB at 800 Hz - 1.4 kHz with slight drive. Shape: Cycling mode off. Chorus: Subtle ensemble.	`Drift: Dual Saw Detune`
Drift: Snappy Acid Pluck	Osc 1: Square / Saw. Filter: Lowpass 24 dB at 250 Hz, Resonance 65-80%. Env 2 -> Filter Cutoff: +45 to +85 st, Decay 180-280 ms, Sustain 0%, Release 150 ms.	`Drift: Resonant Pluck`
Wavetable: Lush Supersaw	Osc 1 & 2: Basic Shapes (Saw). Unison: Classic mode, 6-8 voices, Unison Amount 45-65%. Filter 1: Lowpass 12 dB at 4.5 kHz. Sub: Off or -12 dB pure sine.	`Wavetable: 8-Voice Unison`
Wavetable: Modern FM Bass	Osc 1: Sine. Osc 2: Sine pitched +12 or +19 semitones. Position: Modulate FM amount via Envelope 2. Filter: Clean lowpass at 2 kHz. Mono/Legato: Enabled.	`Wavetable: FM Synthesis`
EQ Eight: 4-Pass Clean	Band 1: Highpass 4x (48 dB/oct) at 30 Hz. Band 2: Bell dip at 250-400 Hz (-2 dB, Q 2.0). Band 3: Surgical notch on harsh resonances. Band 8: High shelf +1.5 dB at 10 kHz.	`EQ Eight: Mix Clean`
Compressor: Sidechain Pump	Sidechain: Enabled, Source: Kick track. Attack: Fast (2-5 ms). Release: Synced to tempo (e.g. 1/8 note ~125 ms at 120 BPM). Ratio: 4:1 to 8:1. Threshold: -18 to -24 dB.	`Compressor: Sidechain Duck`
Compressor: Drum Bus Glue	Threshold: -12 dB (2-4 dB gain reduction). Ratio: 2:1 or 4:1. Attack: Slow (30 ms to let transients pass). Release: Auto or 100 ms. Makeup: +2 dB to match dry level.	`Compressor: Bus Glue`
Saturator: Warm Analog	Curve: Analog Clip or Soft Sine. Drive: +2.0 to +4.5 dB. Dry/Wet: 60-80%. Output: -2 dB to compensate. Color: Enabled, Base: -1.5 dB, Frequency: 1.2 kHz.	`Saturator: Analog Warmth`
Hybrid Reverb: Vocal Space	Convolution: Real room / hall impulse response. Algorithmic: Shimmer or Quartz. Blend: 50/50. Decay Time: 1.8-2.4 s. Pre-delay: 25-40 ms (preserves intelligibility).	`Hybrid Reverb: Pre-delay`
Delay: Ping-Pong Echo	Mode: Ping-Pong, Sync: 3 (1/8D) on Left, 4 (1/8) on Right. Feedback: 35-45%. Filter: Bandpass 400 Hz to 3.5 kHz (prevents muddy low-end build-up). Dry/Wet: 15-25%.	`Delay: Stereo Spread`

15. 8-Genre Production Playbooks (Complete Prompt Blueprints)

Full-session prompt sequences: tempo, scale, drum patterns, chord voicings, basslines, and sound design by genre.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Deep House (122 BPM, D Minor)"	1. Set tempo 122 BPM, scale D Minor. 2. Apply recipe drums/house-909. 3. Apply recipe chords/deep-house on slot 0. 4. Generate walking bassline. 5. Add sidechain pump to chords from kick.	`Full Track Blueprint`
"808 Trap / Hip-Hop (140 BPM, F Minor)"	1. Set tempo 140 BPM, scale F Minor. 2. Apply recipe drums/trap-808. 3. Apply recipe bass/sub-808 with sliding legato notes. 4. Write minor 9th piano stabs. 5. Saturate drum bus with Soft Sine.	`Full Track Blueprint`
"Synthwave / Retrowave (105 BPM, A Minor)"	1. Set tempo 105 BPM, scale A Minor. 2. Apply recipe chords/synthwave. 3. Write 16th-note arpeggiated bassline with Drift. 4. Add LinnDrum / 707 drum pattern with gated snare reverb.	`Full Track Blueprint`
"Melodic / Berlin Techno (128 BPM, C Minor)"	1. Set tempo 128 BPM, scale C Minor. 2. Apply recipe drums/techno-rumble. 3. Generate 5-pulse Euclidean ride pattern. 4. Add resonant 303 acid line with Overdrive. 5. Automate filter sweep.	`Full Track Blueprint`
"UK Garage / 2-Step (134 BPM, E Minor)"	1. Set tempo 134 BPM, scale E Minor. 2. Write swung 2-step drum grid (Kick on 1 & 11, Snare on 5 & 13). 3. Apply recipe bass/reese with lowpass sweep. 4. Add vocal chop stabs with ping-pong delay.	`Full Track Blueprint`
"Liquid Drum & Bass (174 BPM, G Minor)"	1. Set tempo 174 BPM, scale G Minor. 2. Slice Amen break with Simpler. 3. Apply recipe bass/reese on sub track. 4. Write lush Rhodes chord progression with 9ths. 5. Add atmospheric vocal pad.	`Full Track Blueprint`
"Lofi Hip-Hop (84 BPM, Eb Major)"	1. Set tempo 84 BPM, scale Eb Major. 2. Apply recipe drums/lofi-hiphop. 3. Apply recipe chords/neo-soul. 4. Add Vinyl Distortion with gentle crackle. 5. Lowpass master at 14 kHz for tape warmth.	`Full Track Blueprint`
"Ambient / Cinematic (75 BPM, D Dorian)"	1. Set tempo 75 BPM, scale D Dorian. 2. Create Wavetable pad with 8-voice unison. 3. Add Hybrid Reverb with 8s decay. 4. Add exponential LFO curve on cutoff. 5. Write modal progression.	`Full Track Blueprint`

16. The Mixing, Metering & Pre-Mastering Protocol

Surgical 4-pass mixing protocol, reference target meters, gain staging rules, and export safety checks.

Topic / Concept	How It Works & What to Ask Genius	Tools / Target Commands
Pass 1: Gain Staging & Headroom	Set all track faders so individual peaks hover around -12 to -18 dBFS. Master bus should peak at -6 dBFS before any mastering plugins. This preserves analog modeling linearity.	`Rule: -6 dB Peak Headroom`
Pass 2: Low-End Management	Highpass all non-bass tracks at 80-120 Hz using EQ Eight (4x slope). Ensure Kick and Bass do not fight: sidechain duck the bass by 2-4 dB on every kick strike.	`Rule: Clean 100 Hz Sub`
Pass 3: Stereo Balance & Width	Keep all frequencies below 120 Hz strictly 100% Mono. Place mid-range pads and background synths wide (30-60% pan or Haas delay). Keep vocals, snare, and bass dead-center.	`Rule: Mono Bass (<120 Hz)`
Pass 4: Dynamic & Spectral Control	Apply gentle bus compression on Drums and Master (1-3 dB gain reduction, slow attack 30 ms, auto release). Notch out harsh resonances between 2.5 kHz and 5 kHz.	`Rule: Transparent Bus Glue`
Pre-Mastering Limiter Ceiling	Master limiter ceiling must be set to -1.0 dBFS True Peak (or -0.3 dBFS minimum) to prevent inter-sample clipping during lossy MP3/AAC/streaming encoding.	`Rule: -1.0 dB True Peak`
Streaming Loudness Targets	Spotify / Apple Music target: -14 LUFS Integrated (-1.0 dB True Peak). Club / DJ master: -8 to -10 LUFS Integrated. CD master: -7 to -9 LUFS Integrated.	`Target: -14 to -9 LUFS`
Audio Export Checklist	1. Run `live_analyze_mix` to verify zero clipping. 2. Set render bounds to exact loop. 3. Sample rate: 44.1 kHz or 48 kHz. 4. Bit depth: 24-bit with Triangular Dither.	`Checklist: Pre-Export`

17. Complete 108-Tool Master Index (Part 1: Tools 1 to 36)

Core Session, Tracks, Scenes, Clips, Devices, Racks, Meters & Acoustic Analysis.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"1. live_connect"	Connect / ping Ableton Live through Live Actions bridge.	`none`
"2. live_read_set"	Query tempo, time signature, track inventory, returns, master, and scenes.	`include`
"3. live_update_set"	Update BPM, time signature, project scale, or song locators.	`tempo, signature, scale, locators`
"4. live_read_track"	Inspect track mixer, volume, pan, mute, solo, arm, color, and devices.	`track_index`
"5. live_update_track"	Update track name, color, mute/solo/arm, volume, pan, sends, or crossfade.	`track_index, [name, volume, ...]`
"6. live_create_track"	Insert a new MIDI, audio, or return track into the project.	`type, [name, index]`
"7. live_read_scene"	Query scene name, color, tempo, and clip presence.	`scene_index`
"8. live_update_scene"	Update scene name, color, or tempo marker.	`[name, color, tempo]`
"9. live_create_scene"	Create blank scene or capture all currently playing clips into scene.	`[index, capture]`
"10. live_read_clip"	Read session clip: notes, timing, loop start/end, warp, and sample.	`track_index, slot_index`
"11. live_update_clip"	Update clip name, color, mute, loop, start, end, quantize, or write notes.	`track_index, slot_index, [...]`
"12. live_create_clip"	Create MIDI or audio clip in Session (slot) or Arrangement timeline.	`track_index, [slot_index, length]`
"13. live_write_notes"	Write MIDI note list into session clip (creates clip if empty).	`track_index, slot_index, notes`
"14. live_read_device"	Inspect native device, rack chain, drum pad, or VST/AU plugin.	`track_index, device_index`
"15. live_update_device"	Modify device parameters in display units (dB, Hz, ms) or raw values.	`track_index, device_index, params`
"16. live_create_device"	Insert native device by name (EQ Eight, Drift, Wavetable, Compressor, etc.).	`track_index, name, [index]`
"17. live_duplicate"	Duplicate track, scene, or clip with all nested settings.	`type, source, [target]`
"18. live_delete"	Delete track, scene, clip, or device from the session.	`type, target`
"19. live_playback"	Control transport playback: start, stop, continue, record, tap tempo.	`action, [tempo]`
"20. live_select"	Select track, scene, clip, or device in Ableton Live GUI.	`type, target`
"21. live_context"	Read current session context: tracks, tempo, playing clips, selected object.	`none`
"22. live_fire_clip"	Launch or stop session clip by track and slot index.	`track_index, slot_index, [action]`
"23. live_fire_scene"	Launch all clips on a scene row.	`scene_index`
"24. live_record_to_arrangement"	Automate recording from Session clips into the linear Arrangement timeline.	`[scene_index, start_bar, bars]`
"25. live_create_audio_clip"	Load and place an audio sample into a session clip slot.	`track_index, slot_index, file_path`
"26. live_delete_device"	Remove a device from a track's signal chain.	`track_index, device_index`
"27. live_delete_clip"	Delete a clip from a track's session slot.	`track_index, slot_index`
"28. live_read_meter"	Read real-time left/right peak and RMS output meters.	`track_index`
"29. live_read_macros"	Query the 16 macro controls on an Instrument/Audio Effect Rack.	`track_index, device_index`
"30. live_update_macro"	Set a Rack macro value by index (0-based) or parameter name.	`track_index, device_index, macro, val`
"31. live_remove_notes"	Surgically remove MIDI notes by pitch and time bounding box.	`track_index, slot_index, [pitch, ...]`
"32. live_duplicate_to_arrangement"	Directly duplicate a Session clip to a timeline beat position.	`track_index, slot_index, start_beat`
"33. live_read_arrangement_clips"	Query all clips located on the linear arrangement timeline.	`[track_index]`
"34. live_update_arrangement_clip"	Rename or modify a clip positioned on the Arrangement timeline.	`track_index, clip_index, [...]`
"35. live_analyze_audio"	Objective acoustic DSP analysis of a WAV file (LUFS, spectrum, peaks).	`file_path`
"36. live_compare_audio"	A/B diff and compare two audio files for loudness, EQ, and peak delta.	`file_a, file_b`

18. Complete 108-Tool Master Index (Part 2: Tools 37 to 72)

Audio Capture, Knowledge Search, Algorithmic Generators, Offline ALS, Transport, and Take Lanes.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"37. live_record_audio"	Record Live audio output to WAV file via Windows loopback.	`[duration, track_index]`
"38. live_record_and_analyze"	Record audio output from Live and immediately run DSP acoustic analysis.	`[duration, track_index]`
"39. library_read"	Open and read an official manual chapter or studio book.	`path`
"40. library_search"	Search the Genius studio library (manuals and plugin books) by keyword.	`query`
"41. library_db_search"	Full-text search (FTS5) over the local Music/Audio knowledge database.	`topic, query`
"42. live_generate_euclidean"	Algorithmic Euclidean rhythm generator (Bjorklund algorithm).	`track_index, slot_index, pulses`
"43. live_generate_chords"	Generate voiced chord progressions with smooth voice leading.	`track_index, slot_index, progression`
"44. live_generate_walking_bass"	Generate jazz/blues quarter-note walking basslines with chromatic approaches.	`track_index, slot_index, progression`
"45. live_transform_clip"	Apply motif transforms (invert, retrograde, transpose, augment).	`track_index, slot_index, op`
"46. live_write_drum_grid"	Parse multi-line ASCII drum grids into timed MIDI note events.	`track_index, slot_index, grid`
"47. als_summary"	Inspect saved .als set offline: tempo, signature, tracks, master plugins.	`path`
"48. als_list_tracks"	Catalog all tracks, volumes, pans, and loaded devices from saved .als.	`path`
"49. als_extract_midi"	Extract MIDI notes from a clip inside a saved .als file without Live.	`path, track_index`
"50. als_diff"	Diff two saved .als sets to report added/removed tracks, devices, tempo.	`path_a, path_b`
"51. als_find_unfinished"	Lint saved .als for silent tracks, empty clips, missing plugins, unlinked files.	`path`
"52. live_capture_midi"	Trigger Ableton's native Capture MIDI to retrieve recently played keys.	`none`
"53. live_back_to_arranger"	Return playback routing to the Arrangement timeline.	`none`
"54. live_re_enable_automation"	Re-enable parameter automation overridden by manual knob adjustment.	`none`
"55. live_set_crossfader"	Control master crossfader position (-1.0 Side A to +1.0 Side B).	`position`
"56. live_create_take_lane"	Create audio or MIDI comping take lane on an arrangement track.	`track_index`
"57. live_set_fold_state"	Inspect or toggle fold/collapse state of Group tracks in Session view.	`track_index, [folded]`
"58. live_groove_pool"	Inspect grooves loaded in the Groove Pool or attach groove to clip.	`[action, groove_id]`
"59. live_duplicate_loop"	Double a clip's loop length and duplicate all internal notes.	`track_index, slot_index`
"60. live_analyze_mix"	Heuristic structural mix audit (limiter, gain staging, mono bass, empty tracks).	`none`
"61. live_undo"	Trigger native Ableton Undo (Edit -> Undo).	`none`
"62. live_redo"	Trigger native Ableton Redo (Edit -> Redo).	`none`
"63. live_jump_to_time"	Jump the arrangement playhead directly to an exact beat position.	`time`
"64. live_set_overdub"	Enable or disable MIDI/arrangement overdub recording.	`overdub`
"65. live_read_arrangement_length"	Query total length of the active Arrangement timeline in beats.	`none`
"66. live_move_arrangement_clip"	Move arrangement clip to a new start time or different track.	`source_track, source_clip, new_start`
"67. live_read_arrangement_notes"	Extract all MIDI note events directly from an arrangement clip.	`track_index, clip_index`
"68. live_write_arrangement_notes"	Write or append MIDI note events directly into an arrangement clip.	`track_index, clip_index, notes`
"69. live_remove_arrangement_notes"	Surgically remove MIDI notes from timeline clip by pitch/time bounding box.	`track_index, clip_index, [pitch, ...]`
"70. live_read_take_lanes"	List all take lanes on an arrangement track with index and name.	`track_index`
"71. live_update_take_lane"	Rename an existing take lane on an arrangement track.	`track_index, take_lane_index, name`
"72. live_create_take_lane_clip"	Create an empty MIDI clip directly inside a take lane on a track.	`track_index, take_lane_index`

19. Complete 108-Tool Master Index (Part 3: Tools 73 to 108)

Batch Actions, Transport, Drum Pads, Link, Recipes, Editors, Clip Launch, Fades, Envelopes & Shaped Automation.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"73. live_batch_tracks"	Perform set-wide batch operations (mute all, solo, un-arm, reset sends).	`action`
"74. live_stop_all_clips"	Immediately stop all playing clips across all session tracks.	`none`
"75. live_tap_tempo"	Tap session tempo BPM, dynamically updating the project clock.	`none`
"76. live_continue_playing"	Resume transport playback from the current playhead position.	`none`
"77. live_scrub"	Scrub arrangement playhead forward or backward by beat delta.	`beats`
"78. live_jump_cue"	Step transport playhead to the next or previous cue point / locator.	`none`
"79. live_set_punch"	Toggle arrangement punch-in and/or punch-out recording markers.	`[punch_in, punch_out]`
"80. live_set_cue_volume"	Set master headphone / cue preview output volume (0.0 to 1.0).	`volume`
"81. live_move_device"	Move a device to a new position index within a track's device chain.	`track_index, device_index, new_index`
"82. live_read_drum_pads"	Inspect all active drum pads in a Drum Rack with names and mute/solo.	`track_index, device_index`
"83. live_update_drum_pad"	Rename drum pad or customize pad routing in a Drum Rack.	`track_index, device_index, pad_note`
"84. live_focus_view"	Focus a primary Live interface view (Session, Arrangement, Detail, Browser).	`[view]`
"85. live_session_snapshot"	Read-only structural snapshot of the Live Set (tracks, clips, devices).	`none`
"86. live_session_diff"	Compare a previous session_snapshot with current Live state to verify diff.	`previous`
"87. live_read_link_status"	Read-only Ableton Link and external sync status discovery.	`none`
"88. live_list_recipes"	Catalog embedded multi-step music production recipes by category.	`[category]`
"89. live_apply_recipe"	Execute an embedded genre recipe (14 blueprints) by recipe ID.	`recipe_id`
"90. live_inspect_plugin"	Deep device and plugin discovery: inspect parameters on VST/AU plugins.	`track_index, device_index`
"91. live_get_selected"	Inspect what the user currently has selected in Ableton Live GUI.	`none`
"92. live_clear_clip_envelopes"	Reset and clear all parameter automation and modulation envelopes.	`track_index, [slot_index]`
"93. live_create_drum_pattern"	Write drum pattern into MIDI clip using step strings (x, ., o, -).	`track_index, slot_index, pattern`
"94. live_create_chord_progression"	Write voiced chord progression into MIDI clip from Roman numeral strings.	`track_index, slot_index, chords`
"95. live_edit_track"	Unified track editor combining volume, pan, mute, solo, arm, and name.	`op, track_index, [...]`
"96. live_edit_clip"	Unified clip editor combining name, color, mute, loop, and quantization.	`op, track_index, slot_index`
"97. live_edit_scene"	Unified scene editor combining launch, name, color, and tempo.	`op, scene_index, [...]`
"98. live_map_rack_magnitude"	Analyze an FX Rack to discover and map Dry/Wet magnitude macro.	`track_index, [device_index]`
"99. live_set_clip_follow_action"	Configure follow action A/B (none/stop/next/prev/random), chance, and time.	`track_index, slot_index, [action_a]`
"100. live_get_clip_follow_action"	Read follow action settings (action A/B, chance, time) on a clip.	`track_index, slot_index`
"101. live_set_clip_launch_mode"	Set launch mode (Trigger/Gate/Toggle/Repeat), quantize, and legato.	`track_index, slot_index, [launch_mode]`
"102. live_set_clip_fades"	Set fade-in and fade-out times (in beats) on an audio clip.	`track_index, slot_index, [fade_in]`
"103. live_set_clip_markers"	Set start/end markers and loop boundaries on audio or MIDI clip.	`track_index, slot_index, [loop_start]`
"104. live_manage_warp_markers"	Get, add, or delete warp markers on an audio clip.	`track_index, slot_index, action`
"105. live_set_clip_automation"	Write a clip parameter automation envelope (by name and coordinates).	`track_index, slot_index, parameter_name`
"106. live_get_clip_automation"	Check whether a clip has active automation envelopes written.	`track_index, slot_index`
"107. live_commit_groove"	Commit (bake) groove pool swing permanently into clip MIDI note data.	`track_index, slot_index`
"108. live_add_shaped_automation"	Generate shaped LFO automation curves (sine, triangle, saw, square, exp).	`track_index, slot_index, parameter, shape`

20. Power-User Macro Prompts & Syntax Secrets

Advanced chaining, natural language shortcuts, and LOM execution guardrails for power users.

Topic / Concept	How It Works & What to Ask Genius	Tools / Target Commands
Multi-Action Chaining in One Turn	You can combine multiple instructions in a single prompt: 'Create a MIDI track called Reese, add Drift, apply recipe bass/reese, set filter cutoff to 1.4 kHz, and duplicate the clip to arrangement at bar 33'. Genius resolves and sequences all tool calls automatically.	`Macro Prompting`
Conversational Track Addressing	You don't need to specify track index numbers if you named your tracks: Genius automatically resolves 'turn down Lead Synth by 2 dB' or 'duplicate the Drum clip' by matching your track names in the Set.	`Smart Entity Resolution`
Real-World Parameter Units	Always use real musical units instead of guessing raw 0.0-1.0 floats: specify '1.2 kHz', '450 Hz', '-12 dB', '+3 dB', '250 ms', '1/8D', '75%', or semitone offsets. Genius parses and maps display strings natively.	`Unit Mapping`
LOM vs Suite Boundaries	Live 12 Standard Max for Live allows full track, clip, scene, native device, timeline note, and LOM parameter manipulation. However, M4L cannot click native Suite right-click context menus or load non-existent browser items.	`Standard Compliance`
Connection Health & Recovery	If the bridge ever displays 'Waiting for Live...', click the 'Open desktop host' button on the Max device face or hit 'Reset' in the desktop app. The v1.0.27 auto-init task and deferlow queue will instantly restore UDP connection.	`v1.0.27 Stability`
Non-Destructive Generative Jamming	Use `live_session_snapshot` before experimenting. If you don't like an algorithmic generation or recipe, say 'revert to snapshot' or run `live_undo` to instantly roll back your Set state.	`State Safety`

21. Producer Pal Genius -- Chords, Harmony & Generative Melodies

Conversational copy-and-paste prompts for chord voicings, modal interchange, microtonal tunings, and melodic evolution.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Write a 4-bar Neo-Soul chord progression in Db Major with smooth 9th voicings on Rhodes"	Generates voiced chords with voice leading, creates clip on track, and quantizes notes to scale.	`live_generate_chords, live_create_chord_progression`
"Reharmonize chord progression on track 1 with tritone substitutions and passing chords"	Analyzes progression, swaps V chords for bII7 tritone subs, and inserts passing diminished chords.	`reharmonization_engine, live_write_notes`
"Turn this chord sequence into an ambient generative pad with humanized strumming"	Applies 5-25ms micro-time strum delays and per-note velocity/pressure gradients across chords.	`live_mpe_strum_humanizer, live_update_clip`
"Load Turkish Makam Rast microtonal tuning and quantize track 2 notes to the new scale"	Parses scala tuning, loads it into Live 12 TuningSystem LOM, and snaps clip notes to nearest microtonal pitch.	`live_tuning_system, live_scala_tuning_importer`
"Create an ascending jazz walking bassline for ii-V-I in F Major on the Bass track"	Generates quarter-note walking line with chromatic approach notes into chord roots.	`live_generate_walking_bass, live_create_clip`
"Evolve lead melody on track 2: invert second half and apply 15% velocity humanization"	Mirrors melodic intervals vertically on bars 3-4 and applies humanized velocity jitter.	`live_ai_melody_evolver, live_transform_clip`
"Generate a 4-chord modal interchange progression borrowing from parallel Aeolian in C Major"	Drafts Cmaj7 - Abmaj7 - Fm7 - G7sus4, maintaining smooth common tone voice leading.	`live_generate_chords, chord_progression_recommender`
"Take the chord progression from Lakh MIDI dataset that sounds like 80s City Pop"	Searches 31,000+ song dataset for royal road (IV-V-iii-vi) progressions and writes MIDI.	`chord_progression_recommender, live_write_notes`
"Transpose clip 0 on track 3 down 5 semitones and double loop length with variations"	Transposes notes, doubles loop to 8 bars, and adds subtle rhythmic syncopation on repeated bars.	`live_transform_clip, live_duplicate_loop`
"Convert this vocal lead recording on track 1 into a clean MIDI melody line"	Runs vocal pitch tracker, rejects breath noise, smooths pitch bends, and writes monophonic lead MIDI.	`vocal_to_synth_lead, live_create_clip`

22. Producer Pal Genius -- Drums, Grooves, Slicing & Polyrhythms

Prompts for drum pattern programming, Euclidean polyrhythms, slice extraction, swing baking, and acoustic dynamics.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Program a 16-step UK Garage 2-step beat on track 'Drums' with swing on off-beat hats"	Writes kick on 1 and 11, snare on 5 and 13, and syncopated ghost snares with 16th-note swing.	`live_create_drum_pattern, live_write_drum_grid`
"Create a polyrhythmic Euclidean drum pattern: 5 pulses over 16 for kick, 7 over 16 for hats"	Calculates Bjorklund Euclidean distribution across drum notes and creates polyrhythmic groove.	`live_polyrhythm_euclidean_matrix, live_generate_euclidean`
"Configure choke group 1 on Drum Rack pads 42 (Closed Hat) and 46 (Open Hat)"	Inspects Drum Rack pads, assigns shared choke group so open hat cuts off when closed hat triggers.	`live_drum_rack_choke_matrix, live_update_drum_pad`
"Extract groove from audio loop on track 1 and apply 65% of its swing to track 2"	Analyzes timing and velocity offsets, loads into Live Groove Pool, and attaches to target clip.	`live_groove_pool_extractor, live_groove_pool`
"Commit and bake groove swing permanently into MIDI note positions on clip 0 track 1"	Bakes groove timing offsets into actual MIDI note timestamps and removes groove assignment.	`live_commit_groove`
"Slice the breakbeat sample on track 'Sampler' by transients and create a MIDI trigger clip"	Sets Simpler slicing mode to Transient with 85% sensitivity and writes chromatic slice-playback clip.	`live_simpler_slice_transcriber, live_update_device`
"Humanize drum velocities on track 'Drum Kit': soft ghost notes and accented backbeats"	Rewrites velocities: ghost snares to 28-38, backbeats to 110-118, alternating hi-hat dynamics.	`live_drum_velocity_layer_humanizer, live_update_clip`
"Write a classic 808 Trap hi-hat roll pattern with 32nd-note and triplet rolls on bar 4"	Writes straight 16th hats with pitch drops, velocity ramps, and 1/32 triplet bursts on turnarounds.	`live_create_drum_pattern, live_write_notes`
"Build a 4-on-the-floor Berlin Techno drum groove with rumble kick and filtered ride"	Sets up sub-rumble kick reverb chain, offbeat open hat with overdrive, and 16th-note shaker groove.	`live_apply_recipe, live_write_drum_grid`
"Generate a syncopated Afrobeat percussion loop in 6/8 with agogo bells and congas"	Writes polyrhythmic bell pattern with dotted-quarter pulse and interlocking conga slap/open tones.	`live_generate_euclidean, live_write_notes`

23. Producer Pal Genius -- Live 12 Flagships, Roar, Meld, Drift & Sound Design

Prompts for programming Live 12's flagship devices, multi-stage saturation, bi-timbral macro oscillators, and MPE curves.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Add Roar to track 'Bass', set routing to Multi-band, and drive mid-band with +12 dB"	Inserts Roar, sets crossover to 350 Hz / 2.5 kHz, dials mid drive to +12 dB, and softens highs.	`live_roar_multistage_architect, live_create_device`
"Create a lush ambient pad on track 2 using Meld: engine A on Swarm, engine B on Rain"	Loads Meld, configures dual macro oscillators, adds cross-modulation, and opens macro filter.	`live_meld_macro_sculptor, live_create_device`
"Program a warm vintage synth lead in Drift with 40% drift variance and stereo spread"	Inserts Drift, enables analog pitch drift, sets stereo spread to 65%, and shapes cycling envelope.	`live_drift_analog_voice_designer, live_update_device`
"Draw an exponential lowpass filter opening curve over 8 bars on clip 0 track 1"	Calculates exponential curve and writes step automation into clip's Frequency automation envelope.	`live_automation_curve_generator, live_set_clip_automation`
"Inject per-note MPE pitch bend curves into the guitar lead clip on track 3"	Writes microtonal pitch bend ramps (+2 semitones) into individual note events in the MIDI clip.	`live_mpe_expression_painter, live_write_notes`
"Set up envelope follower on Kick track sidechaining filter cutoff on Synth track"	Adds Envelope Follower to Kick, maps output to Synth Auto Filter frequency with 45% depth.	`live_envelope_follower_modulator, live_update_device`
"Duplicate Lead Synth track and turn copy into a wide stereo chorus double"	Duplicates track with devices, detunes OSC by +8 cents, pans hard right, and delays 12 ms.	`live_device_chain_mutator, live_duplicate`
"Design a 4-stage Shaper modulation curve that wobbles the cutoff in a 3/8 polyrhythm"	Writes multi-breakpoint curve into Live Shaper device synchronized to 3/8 beat intervals.	`live_shaper_multi_breakpoint_designer, live_update_device`
"Map Macro 1-8 on vocal rack to: Air, Body, Grit, Reverb, Delay, Width, Comp, Output"	Queries device parameters, maps targets to rack macros, and renames macro display labels.	`live_update_macro, live_map_rack_magnitude`
"Check parameter boundaries for Wavetable Filter 1 Cutoff and set it to 1.8 kHz"	Queries LOM docstring/schema for min/max units and safely sets frequency value.	`live_query_lom_docstring, live_update_device`

24. Producer Pal Genius -- Mixdown, Hardware Feedback, Stems & Performance

Prompts for surgical gain staging, hardware LED feedback, stem export preparation, follow actions, and live diagnostics.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Run a complete mix health audit across all tracks and report clipping and masking risks"	Scans track peak levels, identifies sub-bass stereo widening, and warns of low master headroom.	`live_analyze_mix, live_read_meter`
"Set my Launchpad pad colors: green pulse for playing clips, solid red for stopped clips"	Queries hardware palette table and dispatches exact MIDI velocity bytes to Launchpad LEDs.	`live_hardware_led_palette, live_script_recipe_builder`
"Configure Shift mode on my controller so 8 encoders switch from Volume to Pan"	Generates Python Remote Script ModesComponent layer for seamless encoder role switching.	`live_modes_layer_architect, live_script_recipe_builder`
"Prepare session for stem export: normalize track names, mute disabled tracks, check 0 dB"	Audits session, resets master fader to 0 dB, verifies -6 dB headroom, and color-codes stems.	`live_stem_export_prepper, live_batch_tracks`
"Build an 80-bar Synthwave song arrangement across 6 scenes with tempo transitions"	Generates Intro, Verse, Chorus, Breakdown, Drop, Outro scenes with appropriate clip density.	`live_ai_song_arranger, live_create_scene`
"Set up probabilistic Follow Actions on drum clips: 70% next, 20% jump to fill, 10% stop"	Configures follow action A/B probabilities and target clip slots for generative performance.	`live_clip_follow_action_matrix, live_set_clip_follow_action`
"Create a gradual tempo ramp from 120 BPM to 140 BPM over bars 33 to 41"	Writes linear or Bezier tempo automation points into the Master arrangement tempo lane.	`live_tempo_automation_ramper, live_update_set`
"Check Log.txt for any Python exceptions or listener leaks in my remote scripts"	Parses Live Log.txt in real time and pinpoints unhooked listeners or script syntax errors.	`live_log_error_diagnostician, live_mxdcore_inspect`
"Audit send levels across all tracks to verify gain staging on Reverb and Delay returns"	Calculates cumulative return input levels and flags muddy low-end buildup on FX returns.	`live_send_return_matrix_balancer, live_read_track`
"Tag scene 1 with '[124 BPM] [4/4]' and scene 5 with '[140 BPM] [7/8]' for auto-tempo firing"	Names scenes with Live's native tempo/meter syntax to trigger automatic transport changes.	`live_scene_tempo_signature_tagger, live_update_scene`

25. Producer Pal Genius -- Audio Warping, Granular Flux & Routing

Prompts for audio clip warp modes, Complex Pro formants, granular textures, inter-track routing, and CPU monitoring.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Set audio clip 0 on track 'Vocal' to Complex Pro with 85% Formants and Envelope 25"	Configures Complex Pro warp mode, preserves vocal timbre during pitching, and tightens envelope.	`live_audio_warp_engine, live_update_clip`
"Configure Beats warp mode on the drum loop with 1/16 slice resolution and transient loop Off"	Sets Beats granulation resolution and transient loop mode for ultra-snappy rhythmic decay.	`live_beats_transient_engine, live_update_clip`
"Create an ambient granular drone from clip 0 on track 3: grain size 120 ms, flux 65%"	Modulates Texture warp mode grain size and random flux to generate continuous ambient cloud.	`live_granular_texture_flux, live_update_clip`
"Switch monitoring mode on track 2 to 'In' during rehearsal and 'Auto' for recording"	Directly controls track input monitoring state (In, Auto, Off) for zero-latency mic monitoring.	`live_monitoring_state_control, live_update_track`
"Route MIDI output from 'Arpeggiator' track into input channel of 'Analog Lead' track"	Configures internal track-to-track sub-routing between MIDI generators and instrument tracks.	`live_routing_matrix_config, live_update_track`
"What is Live's current CPU load? Warn me if average process usage exceeds 65%"	Inspects real-time average and peak DSP processing load metrics from Live's Application engine.	`live_cpu_meter_inspector, live_read_meter`
"List all cue points on the Arrangement timeline and jump playhead to 'Bridge 2'"	Queries arrangement locators by name and jumps playhead to target beat position.	`live_cue_point_navigator, live_jump_to_time`
"Freeze track 4 to free up CPU cycles from its heavy Diva synth and reverb chain"	Audits can_be_frozen and executes native track freeze to render 32-bit float audio cache.	`live_track_freeze_control, live_update_track`
"Load sample into RAM mode on clip 0 and fine-tune pitch down by -18 cents"	Enables RAM buffering for instant sample access and applies microtonal cent detuning.	`live_clip_pitch_ram_control, live_update_clip`
"Set metronome count-in to 2 bars and nudge transport tempo up by 1.5% for live sync"	Sets recording count-in duration and triggers transport tempo nudging for manual beatmatching.	`live_metronome_nudge_control, live_playback`

26. Producer Pal Genius -- Browser, Drum Pads & Viewport Automation

Prompts for Browser hierarchy navigation, hotswap targeting, drum pad copying, modal dialog handling, and GUI focus.

What to Say / Prompt (Copy & Paste)	What Producer Pal Genius Does	Tools Used / Params
"Search user library and installed Core Packs for 'analog tape saturation presets'"	Traverses Live's internal Browser categories (User Library, Packs, Audio Effects) for presets.	`live_browser_tree_query, library_search`
"What device or pad is currently in Hotswap mode in Live?"	Discovers active hotswap target in Live and prepares context-aware preset replacements.	`live_hotswap_target_control, live_context`
"Duplicate Drum Rack pad C1 (Kick) to C#1 with all nested Simpler and FX chains"	Programmatically clones drum pad voice architecture and creates pitch-varied double.	`live_drum_pad_copier, live_update_drum_pad`
"Check if any modal warning dialogs are blocking Live and click OK to dismiss"	Reads modal dialog text (missing files, sample warnings) and triggers button click.	`live_dialog_message_handler`
"Toggle the Browser and Detail Clip views off to maximize arrangement view space"	Shows or hides GUI views (Browser, Detail/Clip, Detail/Device, In/Out, Returns, Mixer).	`live_gui_view_visibility, live_focus_view`
"Smoothly scroll Arrangement view to bar 65 and zoom in by 2 steps"	Controls viewport scrolling and magnification across Session matrix and Arrangement timeline.	`live_viewport_zoom_scroll, live_jump_to_time`
"Set the Arrangement loop brace from bar 17 to bar 33 and engage loop playback"	Positions timeline loop markers and enables transport looping on verse/chorus sections.	`live_song_loop_region_control, live_playback`
"Turn the master Groove Pool amount slider up to 75% for all tracks"	Scales set-wide swing intensity across all groove-enabled clips with one master command.	`live_groove_amount_control, live_groove_pool`
"Set clip trigger quantization on track 1 to 1/4 note with Legato launch enabled"	Configures launch quantization and seamless legato playback when switching session variations.	`live_clip_trigger_quantization, live_set_clip_launch_mode`
"Apply 70% firing probability and +/-15 velocity deviation to hi-hat ghost notes"	Injects native Live 12 probability and velocity deviation ranges into individual MIDI notes.	`live_note_probability_humanizer, live_write_notes`
"Enable exclusive track arming so selecting a track disarms all other tracks"	Toggles exclusive arm/solo logic for fast studio tracking without accidental overdubbing.	`live_exclusive_arm_solo_control, live_update_track`
"Transpose only the selected upper-extension notes on clip 0 up by 12 semitones"	Inspects and transforms highlighted notes inside Live's clip editor without touching roots.	`live_clip_selected_notes_transform, live_transform_clip`
"Focus the Wavetable synth on track 2 and open its floating plugin window"	Selects appointed device, brings device chain into view, and reveals floating plugin GUI.	`live_appointed_device_control, live_select`
"Audition and scrub 1 bar of audio from beat 16 in clip 0 without stopping transport"	Scrubs audio clip playback non-destructively to preview vocal phrases or drum fills.	`live_audio_clip_scrub_audition, live_scrub`

GENIUS GOLDEN RULES FOR ABLETON PRODUCERS:

- **Speak naturally:** Genius parses track names, bar numbers, and musical keys directly (e.g. *'turn down Lead Synth by 3 dB'* or *'write an 8-bar progression in F Minor'*).
- **Real Units Work:** You can specify real parameter units like *'1.2 kHz'*, *'-6 dB'*, *'250 ms'*, or percentages -- Genius handles conversion automatically.
- **Pre-Mastering Safety:** Before exporting, always ask *'run a mix health audit'* to verify True Peak limiter headroom and check for phase-cancelling stereo sub-bass.
